BMW Group and Daimler AG invest more than €1 billion in joint mobility services provider

- Game-changing new player to enter growing market for urban mobility
- Vision: all-electric, autonomous, on-demand mobility
- Five joint ventures to be established: REACH NOW, CHARGE NOW, FREE NOW, PARK NOW, and SHARE NOW
- Services already have roughly 60 million customers worldwide
- Plans to create up to 1,000 new jobs worldwide
- BMW Group and Daimler AG to share investments and maximize chances

Berlin. The BMW Group and Daimler AG are pooling their mobility services to create a new global player providing sustainable urban mobility for customers. The two companies are investing more than €1 billion in total to develop and more closely intermesh their offerings for car-sharing, ride-hailing, parking, charging and multimodal transport. The cooperation comprises five joint ventures: REACH NOW for multimodal services, CHARGE NOW for charging, FREE NOW for taxi ride-hailing, PARK NOW for parking and SHARE NOW for car-sharing.

“Our mobility services have developed a strong customer base and we are now taking the next strategic step. We are pooling the strength and expertise of 14 successful brands and investing more than €1 billion to establish a new player in the fast-growing market for urban mobility,” said Dieter Zetsche, Chairman of the Board of Management of Daimler AG and Head of Mercedes-Benz Cars. “By creating an intelligent network of joint ventures, we will be able to shape current and future urban mobility and draw maximum benefit from the opportunities opened up by digitalization, shared services and the increasing mobility needs of our customers. Further cooperation with other providers, including stakes in startups and established players, are also a possible option.”

“We are creating a leading global game changer. The 60 million customers we already have today will benefit from a seamlessly integrated, sustainable ecosystem of car-sharing, ride-hailing, parking, charging and multimodal transport services. We have a clear vision: these five services will merge ever more closely to form a single mobility service portfolio with an all-electric, self-driving fleet of vehicles that charge and park autonomously and interconnect with the other modes of transport,” said Harald Krüger, Management Board Chairman of BMW AG. “This service
portfolio will be a key cornerstone in our strategy as a mobility provider. The cooperation is the perfect way for us to maximize our chances in a growing market, while sharing the investments."

The two companies’ mobility services have a wealth of experience and a strong customer base, with a combined total of over 60 million active customers to date. Building on their current, highly attractive product range and robust customer base in the key regions of Europe and America, the companies will grow their global footprint as their existing mobility services combine to form five joint ventures:

- **REACH NOW** offers more than 6.7 million users simple, direct access to a range of mobility services through a single multimodal platform. The REACH NOW apps will offer a range of options for getting from A to B, allowing users to book and pay directly for public transport and various other mobility options, such as car-sharing, ride-hailing and bike rentals. REACH NOW will be managed by Daniela Gerd tom Markotten as Chief Executive Officer (CEO), with Johannes Prantl as Chief Financial Officer (CFO).

- **CHARGE NOW** is a service by Digital Charging Solutions GmbH (DCS), and its comprehensive charging network is a key contributor to zero-emissions driving. CHARGE NOW makes public charge points quick and easy to locate, use and pay for, both at home and abroad. Digital Charging Solutions GmbH develops simple, standardised access to public charge points for car manufacturers and fleet operators. With over 100,000 charge points across 25 countries, its white-label solutions are helping OEMs and fleet operators to realise their strategies for electric mobility. Customers benefit from cross-border access to one of the world’s largest and fastest-growing charging networks, with over 250 charge point operators (CPOs) to date.

- **PARK NOW** makes parking easier, on-street or off. The innovative digital parking service offers users the best possible parking solutions at a glance, allows them to reserve parking slots and manage their parking times, and enables ticketless entry and exit in public garages as well as cashless payment of parking fees. In addition, with the search for parking currently accounting for about 30 percent of the traffic on urban roads, PARK NOW is helping towns and cities to reduce traffic volumes, thereby helping to make city centres cleaner, healthier and more liveable. In Europe and North America over 30 million customers are already using the service in more than 1,100 cities. CHARGE NOW and PARK NOW are headed by Jörg Reimann as CEO, with Thomas Menzel as CFO.
FREE NOW offers a variety of mobility services including taxis, private chauffeurs with rental vehicles, and state-of-the-art e-scooters, all at the tap of a finger. One of the largest ride-hailing services in Europe and Latin America, FREE NOW already serves more than 21 million customers and over 250,000 drivers, who make a valuable contribution to the reduction of traffic in city centres. FREE NOW is headed by Marc Berg as CEO, with Sebastian Hofelich as CFO.

SHARE NOW is a free-floating car-sharing service that allows customers to rent and pay for vehicles by smartphone — anytime, anywhere. Its fleet will now be extended to incorporate a wider range of models and increase market coverage. More than 4 million customers in total currently use the fleet’s 20,000 vehicles in 31 cities around the world. Car-sharing increases vehicle utilization rates, helping to cut the overall number of cars on the roads in urban areas. Olivier Reppert has been appointed CEO of SHARE NOW, with Stefan Giebke as CFO.

REACH NOW, CHARGE NOW, FREE NOW, PARK NOW and SHARE NOW represent innovative solutions by the BMW Group and Daimler AG for cities and municipalities seeking to make their traffic more efficient and sustainable. Thanks to their established services, the joint venture group already commands significant resources to support and systematically enhance sustainable urban mobility.

“We are steering very clearly towards growth, and together we will continue to invest consistently in our joint mobility services. As well as linking in additional transport options, we want to reach out to even more people in towns and cities across the world, thereby improving the quality of urban life,” Krüger explained.

The new mobility portfolio will be easy to access, intuitive to use, and will cater to customers’ needs. Its seamlessly integrated, sustainable ecosystem will make mobility more convenient — because cities are where the future of mobility will be decided. This is confirmed by the choice of Berlin as the base for the organization’s headquarters. A hub of creativity and innovation, the German capital is an attractive location for employees and upcoming talents. The next few years will see up to 1,000 new jobs created worldwide – including in Berlin and Germany. After an initial phase of investment and growth, the new joint venture group will offer attractive profitability, which will be crucial to its success.
“As premium manufacturers, we have long been setting standards in the automotive industry and for our customers. In the premium vehicle business, we will continue to compete for customers. But our new portfolio for individual urban mobility on demand represents a logical extension to the value chain. Ultimately, we want to offer our customers as many options as possible for getting from A to B. In short, this is about driving, riding or being driven,” said Zetsche.

With their joint mobility services, the BMW Group and Daimler AG are responding to mobility needs of today and the future with a focus on cities. Digitalization is a key enabler as it creates new opportunities for individual mobility. Over time, customers will be able to use and experience additional mobility options from all-electric autonomous fleets that are available on demand, charge and park themselves, and connect with other modes of transport beyond road and rail. In the competition for the best urban mobility solution, the promise of safety and comfort by the two leading German premium OEMs provides the basis for this to happen.
This document contains forward-looking statements that reflect our current views about future events. The words “anticipate,” “assume,” “believe,” “estimate,” “expect,” “intend,” “may”, “plan,” “project,” “should” and similar expressions are used to identify forward-looking statements. These statements are subject to many risks and uncertainties, including an adverse development of global economic conditions, in particular a decline of demand in our most important markets; worsening of the sovereign-debt crisis in the euro zone; a deterioration of our funding possibilities on the credit and financial markets; events of force majeure including natural disasters, acts of terrorism, political unrest, industrial accidents and their effects on our sales, purchasing, production or financial services activities; changes in currency exchange rates; a shift in consumer preference towards smaller, lower margin vehicles; or a possible lack of acceptance of our products or services which limits our ability to achieve prices as well as to adequately utilize our production capacities; price increases in fuel or raw materials; disruption of production due to shortages of materials, labor strikes, or supplier insolvencies; a decline in resale prices of used vehicles; the effective implementation of cost-reduction and efficiency-optimization measures; the business outlook of companies in which we hold a significant equity interest; the successful implementation of strategic cooperations and joint ventures; changes in laws, regulations and government policies, particularly those relating to vehicle emissions, fuel economy and safety; the resolution of pending governmental investigations and the conclusion of pending or threatened future legal proceedings; and other risks and uncertainties, some of which we describe under the heading “Risk Report” in Daimler’s most recent Annual Report. If any of these risks and uncertainties materialize, or if the assumptions underlying any of our forward-looking statements prove incorrect, then our actual results may be...
maternally different from those we express or imply by such statements. We do not intend or assume any obligation to update these forward looking statements. Any forward-looking statement speaks only as of the date on which it is made.

The BMW Group at a Glance

With its four brands BMW, MINI, Rolls-Royce and BMW Motorrad, the BMW Group is the world’s leading premium manufacturer of automobiles and motorcycles and also provides premium financial and mobility services. The BMW Group production network comprises 30 production and assembly facilities in 14 countries; the company has a global sales network in more than 140 countries.

In 2018, the BMW Group sold over 2,490,000 passenger vehicles and more than 165,000 motorcycles worldwide. The profit before tax in the financial year 2017 was €10.655 billion on revenues amounting to €98.678 billion. As of 31 December 2017, the BMW Group had a workforce of 129,932 employees.

The success of the BMW Group has always been based on long-term thinking and responsible action. The company has therefore established ecological and social sustainability throughout the value chain, comprehensive product responsibility and a clear commitment to conserving resources as an integral part of its strategy.

Daimler at a Glance

Daimler AG is one of the world’s most successful automotive companies. With its divisions Mercedes-Benz Cars, Daimler Trucks, Mercedes-Benz Vans, Daimler Buses and Daimler Financial Services, the Daimler Group is one of the biggest producers of premium cars and the world’s largest producer of trucks above 6 tons. Daimler Financial Services provides financing, leasing, fleet management, investment products and brokerage of credit cards and insurance, as well as innovative mobility services. The company’s founders, Gottlieb Daimler and Carl Benz, made history with the invention of the automobile in the year 1886. As a pioneer of automotive engineering, it is a motivation and commitment of Daimler to shape safely and sustainably the future of mobility. The Group’s focus is on innovative and green technologies as well as on safe and superior automobiles that appeal and fascinate. Daimler consequently invests in the development of efficient drive trains with the long-term goal of locally emission-free driving: from hightech combustion engines about hybrid vehicles to electric drive trains powered by battery or fuel cell. Furthermore, the company follows a consistent path towards intelligent connectivity of its vehicles, autonomous driving and new mobility concepts. This is just one example of how Daimler willingly accepts the challenge of meeting its responsibility towards society and the environment. Daimler sells its vehicles and services in nearly all the countries of the world and has production facilities in Europe, North and South America, Asia, and Africa. Its current brand portfolio includes, in addition to the world’s most valuable premium automotive brand, Mercedes-Benz (Source: Interbrand-Study, 10/4/2018), as well as Mercedes-AMG, Mercedes-Maybach and Mercedes me, the brands smart, EQ, Freightliner, Western Star, BharatBenz, FUSO, Setra and Thomas Built Buses, and Daimler Financial Services’ brands: Mercedes-Benz Bank, Mercedes-Benz Financial Services, Daimler Truck Financial, moovel, car2go and mytaxi. The company is listed on the stock exchanges of Frankfurt and Stuttgart (stock exchange symbol DAI). In 2018, the Group sold 3.4 million vehicles and employed a workforce of around 298,700 people. Group revenue amounted to €167.4 billion. Group EBIT amounted to €11.1 billion.
